

Dongyao Product Overview

Copper and aluminum conductive materials and drawing-based parts for industrial sourcing.

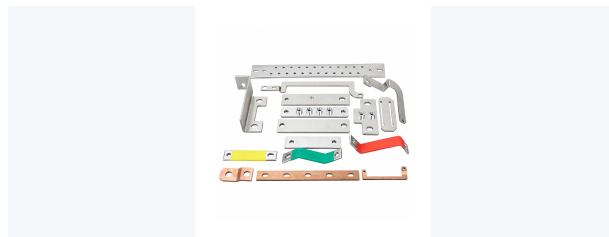

PRODUCT RANGE

Conductive materials and parts

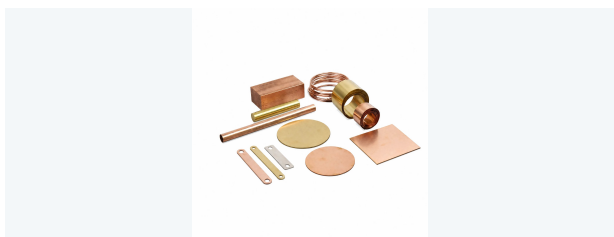

Copper Busbar

Flat conductors for cabinets, equipment connections, and distribution layouts.

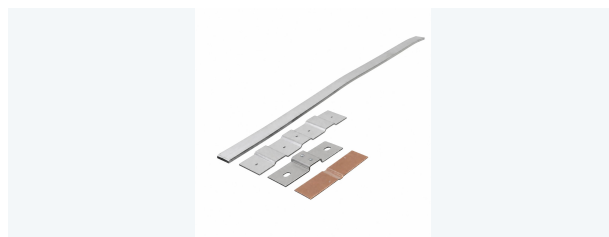

Copper Plate

Copper plate for machining, electrical components, and repeat supply.

Copper Rod

Copper rod for cutting, processing, custom shapes, and industrial components.

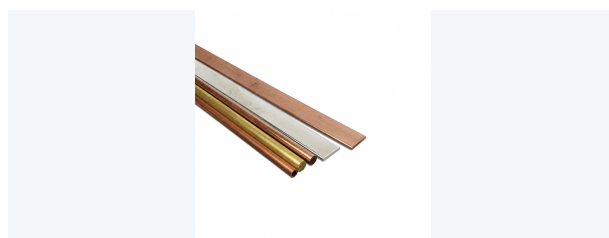

Aluminum Busbar

Lightweight conductive material for assemblies and electrical projects.

Neutral Bar

Neutral and grounding connection parts for cabinets and terminal boxes.

Custom Aluminum Parts

Drawing-based parts matched to dimensions, finish, and application details.

CAPABILITIES

From requirement review to repeat supply

01

Material Review

Discuss copper or aluminum material, thickness, size, conductivity needs, and surface condition.

02

Drawing Review

Confirm dimensions, hole positions, bends, tolerances, samples, and application details.

03

Processing Support

Review cutting, punching, drilling, bending, simple machining, and drawing-based shapes.

04

Inspection and Packing

Align final checks, product identification, quantity, packing notes, and delivery requirements.

Typical order flow

1

Requirement

2

Technical review

3

Supply plan

4

Delivery follow-up

APPLICATIONS AND RFQ

Prepare a clearer sourcing discussion

Common application areas

- Power distribution
- Industrial equipment
- Communication networks
- Rail transit
- Custom assemblies

Information to include with your inquiry

- ☐ Product type and application
- ☐ Drawing, sample, or key dimensions
- ☐ Material and surface finish
- ☐ Quantity and repeat-order expectation
- ☐ Packing, destination, and delivery notes
