

RFQ Requirement Checklist

Use this checklist to prepare product, drawing, material, quantity, packing, and destination details before quotation.

REQUIREMENT CHECKLIST

Information for a useful quotation

1. Product and application

Product name, final use, cabinet or equipment type, and connection requirement.

2. Drawing or dimensions

Drawing file, sample photo, length, width, thickness, diameter, holes, bends, and tolerance.

3. Material

Copper or aluminum preference, grade where known, conductivity need, and insulation requirement.

4. Surface and finish

Bare surface, plating, coating, deburring, marking, or other finish notes.

5. Quantity and schedule

Sample quantity, batch quantity, repeat-order expectation, and requested delivery date.

6. Packing and destination

Packing method, labels, export requirements, destination country, city, and delivery terms.

Before sending your inquiry

- Attach drawings as PDF, DWG, DXF, STEP, or a clear image where available.
- Mark critical dimensions, hole positions, bend direction, and tolerance requirements.
- State whether the request is for a sample, one-time project, or repeat supply.
- Include a contact name, company, email, phone, and preferred response method.
